Art Unit: 1654

1. Claims 1-28 are pending in this application.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 5,164,796. Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention of 5,164,796 selectively uses semi-permeable membranes or compositions which operatively filters the fluid sample and encompasses the instant invention as claimed. Thus, the instantly claimed filter component of the devices are deemed to be an obvious modification of the device claimed in US 5,164,796 because both inventions use semi-permeable membranes or compositions. There is substantial overlap of the subject matter claimed in both inventions.

3. Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 5,094,955.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention of 5,094,955 selectively uses semi-permeable membranes or compositions which operatively filters the fluid sample and encompasses the instant invention as claimed. Thus, the instantly claimed filter component of the devices are deemed to be an obvious modification of the device claimed in US 5,094,955 because both inventions use semi-permeable membranes or compositions. There is substantial overlap of the subject matter claimed in both inventions.

4. Claims 22-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 5,217,876. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods of 5,217,876 selectively uses semi-permeable membranes or compositions which operatively filters the fluid sample and encompasses the instant invention as claimed. As a result, the instantly claimed filter component of the devices are deemed to be an obvious modification of the device claimed in US 5,217,876 because the methods of both inventions use a device comprising semi-permeable membranes or compositions. Therefore, there is substantial overlap of the subject matter claimed in both inventions.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louise N. Leary whose telephone number is (703) 308-3533. The examiner can normally be reached on Monday to Friday from 10 to 6:30pm.
